

Available Live Plants with Wide Climate Adaptability

Notes:

- Cardno is a local nursery that sells to the public. Both Prairie Nursery and Prairie Moon are online retailers that can ship live plants.
- These plants are found to be native in Texas, Arkansas, Missouri, Illinois, Kentucky, Tennessee, Ohio, Pennsylvania, West Virginia, New Jersey, and Virginia.
- It is impossible to say which plants will thrive or decline as a result of Climate Change. Planting for biodiversity is a key.
- For help on your property or garden, contact the HCSWCD for technical assistance to identify which species is suitable for your situation.
